FIRE ANT
FREE

Protect your young trees with Extinguish® Plus.

Extinguish® Plus fire ant bait gives non-bearing trees a fighting chance against fire ants. Extinguish® Plus fire ant bait combines the killing speed of an adulticide and the long-lasting control of an insect growth regulator (IGR). With its two-way action, Extinguish® Plus fire ant bait is economical to use with a great price per acre.

Extinguish® Plus Fire Ant Bait Fact Sheet

Controls

Imported and native fire ants (protein feeding), harvester ants, big-headed ants and Argentine ants.

Active Ingredients

IGR (S)-methoprene 0.25% and Hydramethylnon 0.365%

Long-Lasting

The adulticide, Hydramethylnon, in Extinguish® Plus bait starts killing worker ants immediately after ingestion. Noticeable reduction in the number of active workers is seen within a week. The insect growth regulator (IGR), (S)-methoprene, sterilizes the queen to prevent rebound and mound movement. Colony reduction begins immediately and colony elimination may be seen within 2 weeks. There is no mound movement with Extinguish® Plus bait.

Area of Application

May be applied to, but not limited to, the following areas (please refer to the label for further sites):

- Non-bearing citrus
- Non-bearing fruit/nut trees
- Rangeland
- Pastures
- Nurseries
- Golf courses
- Sod farms
- Sports fields
- School grounds
- Parks

Extinguish® Plus meets USDA fire ant quarantine requirements.

Use Rate

Broadcast – 1.5 pounds of product per acre

Methods of Application

All types — motorized spreaders, aerial, backpack, bait station or hand.

REI

12 hours for worker protection standards only.

Application Timing

Apply as needed, when ants are active and foraging, and soil temperatures are above 60°F. Do not apply product within 6 hours of a rain event. Apply product when areas are dry from dew or irrigation. Some grazing restrictions on treated areas apply (see label).
